

Stefan Bergman Trust Fund

General Description

- Committee is standing.
- Number of members is three.
- Term is one year.

Principal Activities

The committee nominates a recipient for a award annually to a mathematician who is “academically suited to the study of real or complex analysis or partial differential equations with special interest in the areas of either the theory of the kernel function and its applications in real and complex analysis or function theoretical methods in the theory of partial differential equations of elliptic type with attention to Bergman’s operator method”.

Other Activities

Miscellaneous Information

The work of the Committee can be done by mail, regular or electronic, and telephone. Such miscellaneous expenses may be reimbursed. An explanation of travel expense reimbursement of volunteers for this committee is attached. This committee has been designated at **LEVEL F**.

Note to the Chair

Committee chairs should be informed, at the beginning of each fiscal period, the budget of their committees and cautioned to remain within the budget. Such items as travel reimbursement to, accommodations for, and meals for guests of any kind fall within these budgets.

Work done by committees on recurring problems may have value as precedent or work done may have historical interest. Because of this, the Council has requested that a central file system be maintained for the Society by the Secretary. Committees are reminded that a copy of every sheet of paper should be deposited (say once a year) in this central file. Confidential material should be noted, so that it can be handled in a confidential manner.
