| Introduction  | 1   |
| Conformal infinity of hyperbolic spaces                     | 1   |
| Short historical review                                     | 3   |
| Description of the results                                  | 5   |
| Chapter I. Einstein deformations of hyperbolic metrics      | 11  |
| I.1. Asymptotically symmetric metrics                       | 12  |
| I.2. Analysis on symmetric spaces of rank 1                 | 19  |
| I.3. Analysis for asymptotically symmetric metrics          | 27  |
| I.4. Construction of Einstein metrics                       | 38  |
| Chapter II. Quaternionic contact structures                 | 47  |
| II.1. Partial quaternionic connection                       | 48  |
| II.2. Extension of the adapted partial connection           | 55  |
| II.3. Structure of the curvature tensor                     | 62  |
| II.4. Conformal change                                      | 68  |
| II.5. CR twistors   | 72  |
| II.6. Fefferman metric                                      | 77  |
| II.7. The case of dimension 7                               | 80  |
| II.8. Octonionic contact structure                          | 80  |
| Chapter III. Quaternionic-Kähler metrics                    | 83  |
| III.1. Construction of the twistor space                    | 84  |
| III.2. Inverse twistorial construction                      | 94  |
| III.3. Asymptotically symmetric quaternionic-Kähler metrics | 100 |
| Bibliography  | 103 |
